Unit 30: Advertisement Production for Television

Unit code: M/600/6602
QCF Level 3: BTEC National
Credit value: 10
Guided learning hours: 60

Aim and purpose

The aim of this unit is to enable learners to apply production skills to create an advert for television. Learners will examine existing television advertisements to investigate how persuasive messages can be constructed. They will then plan and produce an advertisement for television, and evaluate the effectiveness of their finished product.

Unit introduction

Advertising is all around us and is integral to everyday life. It is one of the largest sectors of the media industry, adverts being presented in a wide range of media such as television, film, radio, magazines, posters, billboards, the press, and the internet. Of all of these, television advertising probably has the highest profile, some television advertisements being so effective and memorable that they become classics and part of the cultural background for a whole generation of viewers. Television is used to market almost every product one can imagine from everyday consumables, like washing powder, to extravagant sports cars, whilst some advertisements promote a service such as insurance, banking or vehicle breakdown cover.

Television advertising has become more and more sophisticated, utilising the very latest digital production techniques. Content and style can be simple or complex, using traditional narrative structures or less obvious surrealist imagery, and messages can be overt or understated. There seems to be no single approach which can be said to be more effective than another.

This unit starts by considering how advertisements are structured, how they try to work and how persuasive messages can be constructed. Understanding these things will create a firm basis on which to plan the production of advertisements for television, as well as enabling learners to become more discerning consumers.

Through research and analysis, learners will examine advertising production and explore the relationship between audience, medium and message. Advertisers invariably aim at a highly specified target audience which, it is hoped, will associate with a particular brand and so choose to buy it. An understanding of how those audiences are thought about and how they are found is therefore essential.

Learners will develop practical production skills and learn how to plan, produce and monitor production through to a completed advert for television. The unit therefore offers an opportunity for learners to engage in activities which are integral to other forms of media production and hence gain skills and knowledge which are highly transferable. Finally, they will evaluate the effectiveness of the finished product.
Learning outcomes

On completion of this unit a learner should:
1. Know about the structures and techniques of television advertisements
2. Be able to originate and develop an idea for a television advertisement
3. Be able to produce a television advertisement
4. Be able to reflect upon own television advertisement production work.
Unit content

1 Know about the structures and techniques of television advertisements

**Structures**: form, eg realist narrative, anti-realist narrative, animation, documentary, talking heads, stand alone, series; style, eg humorous, surreal, dramatic, parodic; codes and conventions (camera angle, shot, iconography, editing, lighting, sound, music); computer graphics; special effects (SFX)

**Techniques**: hidden and overt messages; emotional responses or association, eg solution to a problem, fear, concern, compassion, self-perception, social position; celebrity endorsement

**Characteristics of products or services**: benefits offered; advantages over other similar products; unique selling proposition (USP); lifestyle appeal; brand identity

**Regulation**: Advertising Standards Authority (ASA); Ofcom

**Audience information**: audience measurement panels; ratings; face-to-face interviews; focus groups; questionnaires; programme profiles; Broadcasters’ Audience Research Board (BARB); television research agencies

**Sources of information**: rates cards; advertisers’ information packs; research agency websites

**Audience classification**: Standard Occupational Classification; psychographics; geodemographics; by age; by gender

2 Be able to originate and develop an idea for a television advertisement

**Research for production**: brief; client; budget; deadline; technical resources; technical constraints; identification of target audience, eg quantitative, qualitative, focus groups; conditions of reception; market research data; legal and ethical issues, eg codes of practice, regulatory framework

**Ideas**: ideas generation eg mind-mapping, group discussion, past and current practice; recording ideas, eg notes, sketches; initial plans and proposals; identification of message; content; style; relevance to audience

3 Be able to produce a television advertisement

**Pre-production**: synopsis; script; storyboards; production schedule; location plans; shooting script; risk assessment; crew; actors

**Production**: technology, eg cameras, tapes, tripods, microphones, lights; shooting; lighting; sound recording; health and safety

**Post-production**: technology, eg edit suites, mixing desks; tape logging; edit decision lists; editing; audio mixing

4 Be able to reflect upon own television advertisement production work

**Sources of information**: self-evaluation; documentation, eg notes, sketches, story boards, thumbnails, mood boards, trial layouts, production logs; comments from others, eg audience, peers, tutors, client

**Finished product**: fitness for purpose; clarity of communication; appropriateness to audience; compared with original intentions; effectiveness of techniques; effectiveness of content; impact of work; technical qualities; aesthetic qualities
## Assessment and grading criteria

In order to pass this unit, the evidence that the learner presents for assessment needs to demonstrate that they can meet all the learning outcomes for the unit. The assessment criteria for a pass grade describe the level of achievement required to pass this unit.

### Assessment and grading criteria

<table>
<thead>
<tr>
<th>To achieve a pass grade the evidence must show that the learner is able to:</th>
<th>To achieve a merit grade the evidence must show that, in addition to the pass criteria, the learner is able to:</th>
<th>To achieve a distinction grade the evidence must show that, in addition to the pass and merit criteria, the learner is able to:</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>P1</strong> describe structures and techniques of television advertisements with some appropriate use of subject terminology [IE]</td>
<td><strong>M1</strong> explain structures and techniques of television advertisements with reference to detailed illustrative examples and with generally correct use of subject terminology</td>
<td><strong>D1</strong> comprehensively explain structures and techniques of television advertisements with elucidated examples and consistently using subject terminology correctly</td>
</tr>
<tr>
<td><strong>P2</strong> originate and develop an idea for a television advertisement working within appropriate conventions and with some assistance [CT, IE]</td>
<td><strong>M2</strong> originate and develop an idea for a television advertisement showing some imagination and with only occasional assistance</td>
<td><strong>D2</strong> originate and develop an idea for a television advertisement showing creativity and flair and working independently to professional expectations</td>
</tr>
<tr>
<td><strong>P3</strong> produce a television advertisement working within appropriate conventions and with some assistance [TW, SM]</td>
<td><strong>M3</strong> produce a television advertisement to a good technical standard showing some imagination and with only occasional assistance</td>
<td><strong>D3</strong> produce a television advertisement to a technical quality that reflects near-professional standards, showing creativity and flair and working independently to professional expectations</td>
</tr>
<tr>
<td><strong>P4</strong> comment on own television advertisement production work with some appropriate use of subject terminology. [RL]</td>
<td><strong>M4</strong> explain own television advertisement production work with reference to detailed illustrative examples and generally correct use of subject terminology.</td>
<td><strong>D4</strong> critically evaluate own television advertisement production work in the context of professional practice, with elucidated examples and consistently using subject terminology correctly.</td>
</tr>
</tbody>
</table>

**PLTS:** This summary references where applicable, in the square brackets, the elements of the personal, learning and thinking skills applicable in the pass criteria. It identifies opportunities for learners to demonstrate effective application of the referenced elements of the skills.

### Key

| IE – independent enquirers | RL – reflective learners | SM – self-managers |
| CT – creative thinkers | TW – team workers | EP – effective participators |
Essential guidance for tutors

Delivery

This unit builds on other production and pre-production units and, therefore, the practical element can be based on pre-existing technical skills (knowledge of techniques and technology). In order to express their intentions successfully, learners’ will need to be able to use technology effectively.

Whilst it is conventional for learners to work within a small production group to produce an advert, an important consideration for this unit is that each learner must be encouraged to generate their own work where possible. This will enable them to demonstrate a personal understanding and engagement in the production process, even if they have worked together as a small production team.

The unit also provides an opportunity to develop further understanding of the ways in which media messages are constructed to meet the needs of a particular client and with a particular audience in mind and offers further opportunities to investigate the wider context within which the media industry operates. Tutors will need to ensure that learners have an understanding of how these processes, economic factors and regulatory structures impinge on the production of a television advertisement. Once the background knowledge and understanding have been established, the unit can be taught largely in the context of practical production.

The first stage of the unit can be taught through a series of formal sessions where learners are encouraged to examine a range of individual television advertisements. Initially it would be beneficial for the group to discuss with each other, within the class, what they can recall about television adverts that may have had an impact on them, and to start to unravel why certain adverts are more memorable and effective than others. This learning can be reinforced with self-directed studies to investigate television advertising through libraries and the internet but a good range of practical examples should be available to view within the sessions.

Attitudes to advertising can be discussed, with tutors exploring individual learner and group perceptions and susceptibility to adverts, using the class as a focus group. It would be helpful at this stage if the tutor referred to up-to-date information on the effects of television advertising on sales.

Regulatory control has undoubtedly helped shape the style and content of advertisements with codes of practice and regulatory bodies defining issues to consider during the planning and review stages of production. A number of case studies could be reviewed to generate debate, looking at issues such as the way in which children are targeted or the use of stereotyping. It is also interesting to note the differences between UK adverts and those from other countries, or the way in which adverts for a particular product have changed over a period of time.

Learners should be encouraged to select peers, friends and family to take part in research into previous television adverts and audience perceptions, finding out about developments in content, style and technology. It is important for learners to understand that these investigations, whilst forming an important part of the evidence of understanding for this unit, will also help them to be able to contribute more effectively to their own advert.

Initial ideas creation can be a collaborative process and it is recommended that, where possible, a simulated client brief be used to clearly set out the requirements of the practical task. However, individual learners should always keep a file of their own production work and not be prevented from producing several initial proposals together with the associated research material. In this way all learners will be helped to understand the constraints applicable, experiencing the stages of production and working within regulatory controls. It would be advantageous when working to a brief for learners to be able to present their proposals to a notional client and respond appropriately to feedback.
Outline learning plan

The outline learning plan has been included in this unit as guidance and can be used in conjunction with the programme of suggested assignments.

The outline learning plan demonstrates one way of planning the teaching and assessment of this unit.

</tbody>
</table>
Topics and suggested assignments and activities

Assignment 3 – Get It Made
Complete planning and pre-production work covering:
- budget
- time
- personnel
- facilities
- locations
- clearances
- copyright (intellectual property)
- health and safety
- codes of practice and regulation.

Apply production techniques to create the product:
- gathering content and recording material
- editing, manipulating or arranging content
- post-production – finishing touches.

Feedback:
- present interim production work to client group – gain formative feedback
- respond to feedback – make adjustments.

Assignment 4 – Did It Work?
Learners will present final production work to client and audience focus group to gain summative feedback, and then write report evaluating own production project work.

Unit learning and assessment review.

Assessment

Evidence for assessment
Case study work, background research and a final production will form the basis of evidence for this unit. If group work is planned it is vital that each learner develops a personal portfolio of evidence.

Achievement of learning outcome 1 could be evidenced through a written report or recorded presentation. A textual analysis linked to the declared purpose of a range of selected adverts could investigate production techniques, concepts and regulatory control. A written contextual analysis of current and past advertisements would provide evidence that learners have understood the background and context for production. Market research and audience sampling methods could be included in this section.

Tutors may wish to consider other forms of evidence where appropriate. Examples might be PowerPoint or animated presentations, audio recordings and video recorded presentations. Where appropriate, evidence can be supported by tutor observation checklists and witness statements though this form of evidence should not be overused.
For some learners, a formal viva voce assessment might be appropriate. When more than one learner in a cohort is assessed in this way care must be taken to ensure that all learners are asked equivalent questions, and that all are given equal opportunities to expand or clarify their answers. Interviewers must also ensure that questions are not phrased in such a way as to provide or suggest an answer. Formal vivas should be recorded for the purposes of internal and external verification and at least 50 per cent of such assessments must be internally verified.

Evidence for achievement of learning outcome 2 will typically consist of a planning and research file which contains initial ideas and demonstrates the development of one of those ideas into a treatment. The treatment will form the basis of the final product.

Achievement of learning outcome 3 will be evidenced through the final product. Where learners are working in groups, the individual contribution of each learner needs to be clearly shown and supported by the learner’s log (as well as any reflective accounts within evidence presented for learning outcome 4) along with tutor and peer observations. Where individual learners in a group disagree with decisions made by the rest of the group they can elucidate their own ideas and creative proposals within their production documentation.

Evidence for achievement of learning outcome 4 could be a formal written evaluation, or a presentation with illustrative extracts.

**Application of grading criteria**

When applying the grading criteria tutors should follow the advice given below. Please note that the examples of evidence given here are indicative only. This advice is not inclusive and the examples need not be included in a learner’s work in order for that learner to achieve the exemplified grade.

**Pass**

To achieve a pass grade, learners must achieve all the criteria at pass level. For each of the criteria learners must present evidence that addresses each italicised sub-heading of the content for the learning outcome.

P1: learners will refer to a range of different types of television advertisements in terms of the ways in which they are constructed and the techniques of persuasion they employ. The range may be limited or may not necessarily have expanded from any ‘given’ material. Learners may not have fully explored the relationship with how products are specifically targeted towards target markets or how audiences can react to different advertisements in different ways. Learners will outline audiences for advertisements simply but accurately using the appropriate categorisation systems, and will describe, or demonstrate through application, the means available for gathering information about audiences. Learners will give descriptive responses which are relevant, accurate and substantial, though not necessarily absolutely complete, and reference to the examples studied will be generalised, referring to whole advertisements rather than specific elements of those advertisements.

P2: learners will consider a limited range of ideas for the production of television advertisements which may appear to have been reached arbitrarily. They will provide limited supporting material.

P3: the technical quality of the finished advertisement will be acceptable and the advertisement will have shape and some sense of design. The activity that led to it will have been purposeful, with the deliberate application of chosen techniques.

P2 and P3: in terms of the aesthetic or imaginative qualities of their work, learners will not move beyond the conventional, but the conventions applied will be appropriate to the style of advertisement or the nature of the product being advertised. Learners will need frequent assistance and support, though they will take note of and make use of this help when it is given. If they are in frequent need of such help but fail to make positive use of it they should not be considered for a pass grade for this unit.
P4: learners will consider their own work in such a way that they move beyond merely describing it. They will make evaluative comments about what they have done but these comments will be assertions that are not supported by evidence or exemplification. They will typically identify some technical flaws and make some reference to feedback from tutors, peers and client (if there is one), but will not fully appreciate the reasons why the techniques are not effective. Conclusions are likely to be simplistic.

P1 and P4: evidence will show a basic understanding of technical terminology but learners will generally be unsure about this vocabulary and will make fairly frequent mistakes when they do use it.

**Merit**

To achieve a merit grade, learners must achieve all the pass and all the merit grade criteria. For each of the criteria learners must present evidence that addresses each italicised sub-heading of the content for the learning outcome.

M1: learners will talk about the structures of television advertisements in such a way as to show why they are constructed the way they are, and about persuasive techniques in such a way as to show how and why they are used. They will explain clearly how to find out about audiences (or be able to apply this to good effect) and how the categorisation systems are used in audience profiling. Relevant examples that draw upon elements of the advertisements studied will be given to support what is said, but the learner will not elucidate these examples to show how they illustrate the points they support. Learners will cite examples other than those considered in class.

M2: learners will consider a range of effective ideas that are supported with carefully produced documentation such as mind maps, initial scripts, location recce, and notes on constraints on production. Work will be approached methodically and with adequate preparation. Ideas will be worked out and presented neatly.

M3: learners will show facility and some confidence in relation to skills and the handling of equipment. Processes will be undertaken with care and, generally speaking, thought will be put into the work.

M2 and M3: learners will still be working within recognisable generic conventions, but there will be some imaginative thought behind the work. Learners will need little assistance, though typically they will still need some support when dealing with more complex technology or trying to apply more sophisticated techniques and, like the pass grade learner, they will benefit from it.

M4: learners will explain what they have tried to accomplish and how they have worked to try to achieve what they have set out to do. They will explain decisions made and will exemplify these explanations through relevant and detailed reference to their own work, though the examples they give will not be further elucidated. Evaluative work will clearly explain strengths and weaknesses of technical aspects and refer in detail to relevant feedback from tutors, peers, and client (if there is one).

M1 and M4: learners will use technical vocabulary for the most part correctly, but may make mistakes or be unsure about usages at times.

**Distinction**

To achieve a distinction grade, learners must achieve all the pass, all the merit and all the distinction grade criteria. For each of the criteria learners must present evidence that addresses each italicised sub-heading of the content for the learning outcome.

D1: learners will discuss the structures and persuasive techniques of a varied selection of advertisements in such a way that they develop their ideas critically (that is, compare, assess and discriminate). Points made will be justified with supporting arguments and learners will draw out of an example precisely what it is about it that exemplifies the point it illustrates. Exemplification will be drawn from precise details of the advertisements referred to and these examples will be details from the advertisements studied, not merely generalised reference to whole advertisements. When discussing the categorisation of audiences and the resources available to develop audience profiles, fuller and more extensive explanation and argument to support points made, will discriminate between this grade and the merit.
D2: learners will explore independently a wide range of effective and well-thought through original ideas and designs for production. Documentation will be of a high technical standard and will closely reflect industry conventions for presentation.

D3: technical and production skills will be approaching a professional standard and will bear comparison with it.

D2 and D3: codes and conventions will be deployed with creativity and flair, and technical skills will be used with ingenuity and occasionally surprising results. In all practical activity learners will be capable of working autonomously and effectively. They will be able to work on their own initiative, will not need constant support or supervision, will give the work their full commitment, work positively and cooperatively with others, and meet deadlines. In other words, they will have the kind of self-management skills that would be expected of them in a professional context. Note also that this criterion should not be taken to mean that learners do not seek advice or that they work without discussing things with their tutor, but rather that they are not dependent upon the support of others and that when they take advice they weigh it carefully for themselves.

D4: evaluative work will fully explore the implications of feedback from tutors, peers and client (if there is one) and demonstrate a sophisticated understanding of the devices and techniques employed. Learners will make an accurate and critically objective assessment of their own achievement with detailed reference to elucidated examples taken from that work. They will make critical comparisons of their own work with current or past practice in a relevant area (that is, the same genre or format as they have worked in).

D1 and D4: technical vocabulary will be secure and used correctly and confidently at all times.

Programme of suggested assignments

The table below shows a programme of suggested assignments that cover the pass, merit and distinction criteria in the assessment and grading grid. This is for guidance and it is recommended that centres either write their own assignments or adapt any Edexcel assignments to meet local needs and resources.

<td>Writing for Television and Video</td>
</tr>
</tbody>
</table>

There are opportunities to relate the work done for this unit to Skillset National Occupational Standards in Camera, Directors, Editing, Lighting for Film and Television, Production (Film and Television), and Sound as follows:

**Camera**

C2 Specify camera equipment required
C4 Obtain, prepare and return equipment
C12 Provide assistance to record and review the video image
C13 Maintain camera batteries during shoot
C14 Co-ordinate the crew to position a camera
C27 Elevate and track the video camera
C28 Position and move the camera to frame and compose the image

**Directors**

D1 Investigate the viability of ideas for productions
D4 Input into pre-production planning
D5 Select a creative and technical team
D6 Review the suitability of potential locations and studios
D7 Direct the production
D10 Supervise the post-production process
Editing
E1 Identify and agree editing outcomes and process
E5 Capture pictures and sound for nonlinear editing
E11 Edit materials using non-linear equipment
E23 Realise complex effects

Lighting for Film and Television
L2 Conduct a recee from an electrical viewpoint
L7 Lighting for a single camera
L11 Set lighting to meet the desired effect

Production (Film and Television)
P41 Assist gallery operations and production of multi-source recorded productions
P42 Assist live multi-source productions
P45 Assist with the post-production process

Sound
S1 Work effectively in sound production
S2 Identify, devise and manage the sound requirements
S5 Rig sound equipment.

Essential resources
Learners should have access to appropriate audio-visual recording and editing production and post-production equipment. All resources must be up to date, and of near-industrial standard and capability. Learners will need facilities that will enable them to conduct appropriate pre-production investigation tasks.

A range of examples of advertisements made for television should be used for class reviews, helping to create an understanding of what constitutes effective advertisements and those which are less successful in their ambitions.
Employer engagement and vocational contexts

Centres should develop links with local advertising agencies. Learners will benefit greatly from contact with industry practitioners who have had recent experience in media production. A visiting speaker such as a producer or production manager for a recent advertisement would be helpful, as would an opportunity to study pre-production documentation from an existing production. A guide to the structure of the advertising industry can be found at www.adbrands.net/agencies_index_basics.htm.

Skillset, the Sector Skills Council for the creative media sector, has a substantial section of its website dedicated to careers, including job descriptions, as well as giving an overview of the knowledge, understanding and skills required: www.skillset.org/careers/.

Further general information on work-related learning can be found at the following websites:

## Delivery of personal, learning and thinking skills

The table below identifies the opportunities for personal, learning and thinking skills (PLTS) that have been included within the pass assessment criteria of this unit.

<table>
<thead>
<tr>
<th>Skill</th>
<th>When learners are ...</th>
</tr>
</thead>
</table>
| **Independent enquirers** | analysing and evaluating information, judging its relevance and value as applied to production work  
                               carrying out research to develop ideas for the production of television advertisements  
                               planning and carrying out research into television adverts to develop their understanding of technologies and techniques  
                               exploring issues, events or problems from different perspectives when producing a proposal which addresses the needs of a client or set brief  
                               supporting conclusions, using reasoned arguments and evidence when evaluating strengths and weaknesses of own work |
| **Creative thinkers**   | generating ideas for a creative and innovative proposal and exploring possibilities for production of television advertisements  
                               trying out alternatives in production work and following ideas through, adapting ideas as circumstances change |
| **Reflective learners** | reviewing and reflecting on their television advertisement production and acting on the outcomes to modify and improve their work  
                               setting goals during pre-production and planning work  
                               evaluating experiences and learning through explanation of strengths and weaknesses of own television advertisement production work |
| **Team workers**       | collaborating with others when working within teams towards common goals during production work  
                               adapting behaviour during production of media product, to suit different roles and situations  
                               taking responsibility during production work, showing confidence in themselves and their contribution |
| **Self-managers**      | organising time and resources and prioritising actions when researching and producing television advertisement work, whether working on their own or in a group  
                               working towards goals and deadlines set for production work, showing initiative, commitment and perseverance. |
## Functional Skills – Level 2

### ICT – Use ICT systems

<table>
<thead>
<tr>
<th>Skill</th>
